FIRE DEPARTMENT

2008 Annual Report

Dear Members of the Board:

Once again, it is my pleasure to present our 2008 Annual Report for the El Dorado Hills County Water District (Fire Department). As your Fire Chief, I wish to extend our gratitude to you, our Board of Directors, for your continued governance and support. We have had another great year. We are proud of our many accomplishments this past year and, most importantly, we have provided our services safely.

We are glad to report that the transitional year of 2008 is behind us. All probationary employees have performed flawlessly and have cleared the probation hurdle. All of

our programs have been successful and our service to the community has been exemplary.

Growth has slowed dramatically and may present some fiscal challenges for the future. Our calls for service have increased slightly and we have absorbed the increase with ease. We opened our fourth station this year in the Business Park and, as a result, we are providing quicker response.

As alluded to earlier, for the first time in my 15 year career with our Department, we are facing some challenging economic times. Through years of prudent fiscal planning, the District is in excellent financial shape, but due to the economy and increasing expenses, our annual operational expenditures are showing signs of exceeding our annual revenue generation. We have strategized on this topic and will be making adjustments to maintain a positive cash flow with every effort not to deficit spend and keep our reserves secure.

In closing, I wish to thank our Administrative Staff who have surpassed all my expectations during the transition and truly are the backbone of this Department. Another huge thanks to the Line Staff and Volunteers. Obviously, they are where the rubber meets the road and are to be commended for the outstanding service they provide to the community. We welcome the New Year and its challenges because with challenge, there is opportunity. "Let's Shine in '09!"

Sincerely,

EL DORADO HILLS FIRE DEPARTMENT

Brian K. Veerkamp, Fire Chief

Brian K. Verkamp

District Information

DISTRICT INFORMATION

Staffing, development, revenue and District assessed value increased slightly in 2008. Highlights are as follows:

- ➤ This year, a Budget Advisory Committee reviewed all budget items prior to the Board receiving them.
- Assessed Value for the District is up 4% for 2008 which is down 10% from the average increase of 14.5% per year over the past five years.
- ➤ Property Tax Revenue increased 7% for the 2007/2008 fiscal year; however, it is only projected to increase 3.75% for 2008/2009. Property Tax Revenue is up an average of 14% per year over the past five years. (These figures are distorted by the Supplemental Tax Revenue which was also higher in previous years.)
- ➤ The Commercial Development also follows the decline in the economy. There was only 10,767 square feet in new commercial development as compared to 291,969 square feet last year. Over the past five years, the average is 317,278 square feet.
- ➤ There is less than a 1% increase in homes built which is down from 3% the year before. This has negatively impacted projected Development Fees and Property Tax Revenue.
- ➤ Development Fee Revenue collected in 2008 was \$479,097. Residential home starts have declined over the past couple of years. We have collected over eight million dollars in development fees over the past five years.

As you can see, the El Dorado Hills Fire District is growing at a very modest rate especially compared to years past. The Department remains proactive in meeting the ongoing challenges it faces to manage the growth and development needs in our community. Staff will continue to maintain control of the budget in these difficult economic times.

Calls for Service

CALLS FOR SERVICE

The year 2008 saw an overall increase of 1.3% in calls for service in our community of El Dorado Hills and the surrounding automatic aid areas. Following are highlights of the service calls that our personnel responded to throughout this busy year:

- Medical Aid calls decreased by approximately 1.8%. Changes within the service model are allowing our unit to remain in the assigned primary response area, decreasing our out of district response.
- ➤ Auto Accidents decreased by 17.7 % (183) and is a sharp decline from the steady pattern over the last 4 years (average of 215). CHP presence and more speed control measures may have influenced this number. CHP now has a service office in Station 85.
- ➤ Wildland/Grass/Brush Fires overall decrease in response by 5.5%. Even with the overall decrease in number, the weight of the responses was heavy on the Department in the time/length of deployment of Department resources. We experienced 24 requests for resources to OES/CAL FIRE/USFS.
- Fires in Buildings/Structures The number of structure fires our personnel were involved in actually decreased by 4.4% in district, but the number of structure incidents increased by nearly 40% as a result of heavier involvement due to the Auto/Mutual agreements in place.
- ➤ Auto/Mutual Aid response increased by 14.3% with a marked increase of multiple resources requested for a incident.

The wildland fire season in 2008 was historic. El Dorado Hills Fire was extremely involved with all the state needs for resources. We answered the call for help from CAL FIRE in staffing back coverage for the county as well as sending multiple units to Northern and Southern California throughout the fire season. We participated in every major campaign fire throughout the state. These opportunities enabled our personnel to gain valuable experience and knowledge that we can apply when needed here in El Dorado County. We are recognized as a strong contributor and vital player in the overall Auto/Mutual Aid plan.

El Dorado Hills Fire also sponsored an additional medic unit for approximately 5 months last year. This additional medic unit was invaluable in supplying information and data to secure a permanent medic be added to the system. That medic unit is currently in place, operating and serving the SA-7 area.

The El Dorado Hills Fire Department remains highly involved in our community and with our neighbors. The Department will continue to meet the needs of our public.

Training & Emergency Services

TRAINING AND EMERGENCY SERVICES

The Training and Emergency Medical Services Division experienced another successful year in 2008. Highlights of the year include the following:

- Completion and implementation of the El Dorado Hills Fire Department Career Task Book Program for pre-promotion and post-promotion guidance
- ➤ El Dorado County Volunteer Recruit 2008 Academy
- Implementation/update of the El Dorado Hills Fire Department "Red Card" Wildland Certification Program
- ➤ Continuation of EVOC training for on-road and 4x4 off-road driving
- ➤ Continuation of Fire Simulator exercises for the entire department
- ➤ Continued training at the Sacramento High Rise Drills
- Assisted Volunteer personnel to develop as paramedics by providing internships, ride alongs, and training. Even though some of our new personnel paid their own way through school, El Dorado Hills Fire Department continues to maintain four slots in the Paramedic Program at American River College
- Kimberly Alyn Leadership Training Series
- ➤ Department implementation of LARRO (Low Angle Rope Rescue Operations)
- > Began Bloodborne Pathogen Training

We continue to serve our most important customers which are our own career and volunteer personnel. The rewards of this training are transferred to our community in the form of constantly higher levels of emergency response and service.

Fire Safety & Prevention

PREVENTION

Despite the economic slowdown, this year has been very busy and challenging. We continue to develop the fire prevention bureau into a more efficient and user friendly place for the community to find answers to their questions. Our goal is to make information easier to access through building standards and regulations.

New commercial building starts are significantly down from last year throughout the county. We continue to see a steady flow of smaller projects like tenant improvements that keep us busy with plan checks and inspections. Developers are continually looking for creative ways to lease building space which takes time to research in the codes and regulations for the answers.

New home starts are also down in numbers although the average size of the home is over 4,000 square feet, not including garages. With the water flow per dwelling unit requirement that was implemented in the January 2008 code adoption, 12 of the permitted homes have been required to have fire sprinklers installed and one home was required to have a water tank for fire suppression. Fire safe construction has also been implemented with the new code drastically reducing the possibility of ignition during a wildfire event. These requirements continue to improve the life safety of our citizens and protect homes within the community of El Dorado Hills.

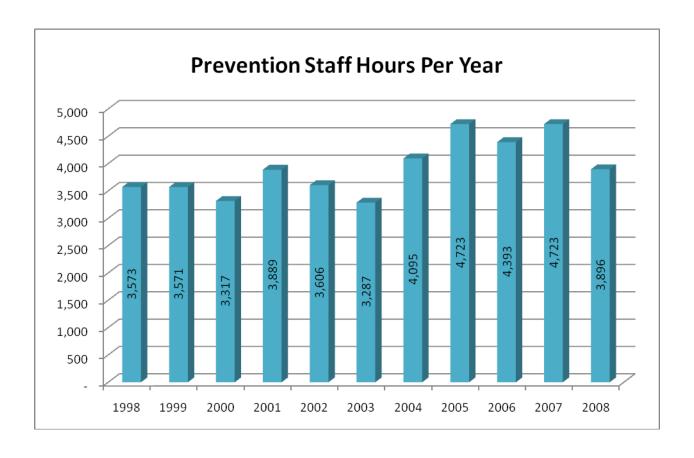

The annual vegetation hazard fuel reduction program has gone through significant changes this year due to newly implemented requirements. All home owners that have exposure to a catastrophic wildland fire will benefit from these changes because the defensible space has increased from 30 feet to a total of at least 100 feet. This increased space gives Firefighters the ability to safely defend lives and property if a wildland fire should occur.

Detailed below are some areas of interest for 2008:

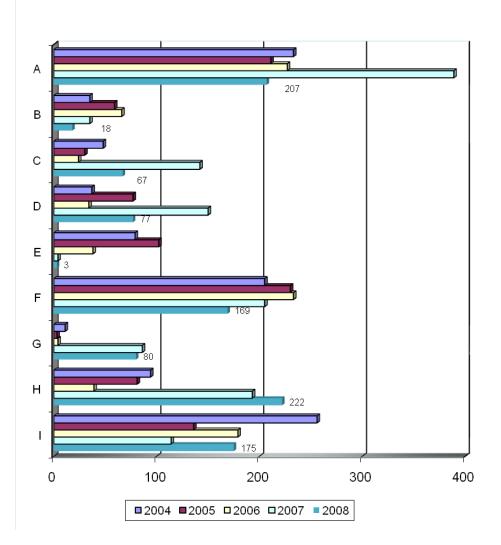

- ➤ Working on a regional grant through Assistance to Firefighters to develop and implement pre-fire plans for all commercial buildings in the county.
- > Implemented the county wide rural water standard for homes on a well or having insufficient water flow.
- ➤ Provided a fire safe demonstration area at the Wild Oaks Park to show what the new implementation of the 100 foot defensible space looks like to the community.

Fire prevention is a team effort between the fire prevention bureau, the Firefighters, Volunteers and the community. We will continue to work with the community to protect life and property for all that live in El Dorado Hills.

Apparatus

APPARATUS

The year 2008 saw an overall increase in apparatus down time compared to the previous year. The primary issue was an extended maintenance down time for Truck 85. In addition, the increase can be attributed to the increase in calls for service, prevention activities, training and maintenance travel times. While the goal of localizing maintenance had some success this last year, down time for off-site repair and maintenance continues to increase. The following are the issues, changes and highlights for 2008:

- Apparatus down time improved on Annual and Minor/Moderate maintenance and repair by utilizing on-site work by Johnson Mobile Repair and the Veerkamp Shop.
- ➤ Major repair time dramatically increased due replacement part issues and damaged parts being supplied.
- ➤ The department put out for surplus/purchase a 1999 Ford Expedition Utility/Command set up. The vehicle was bought and placed into service by the Mosquito Fire Department
- Truck 85 had a out of service/unavailable time increase to 163 days. This equates to a out of service rate of 44%. 128 days can be attributed to a major Hydraulic System overhaul and repair in one stretch. The hydraulic system has been updated and is fully functioning.
- ➤ E84 (8572) was out of service 46 days with a 12% down time. All other apparatus had minimal down time.
- The department fleet is now at 25, with an additional 4 trailers.

No new apparatus was purchased in year 2008. The Apparatus Committee is continuing to utilize an apparatus replacement plan that calls for two new Type I/II engines in the year 2009 and have started the design/specification process.

Fleet maintenance will continue to be an interesting challenge for the District. Fleet readiness and reliability continue to be the number one goal of the Maintenance Division.

Steve Enos Captain, Fleet Maintenance

Dennis Planje Deputy Chief, Operations
